Damage to Mirror Doors Must be Reported to RW Within 24 Hours.

NOTE: There is a 30% Re-Stocking Charge on All Mirror Doors

GENERAL DESCRIPTION

THE SPACE SAVER

An easily assembled, structurally strong pocket door frame. Designed for the builder or do-it-yourselfer. Provides a space saving opportunity while still assuring privacy. Pocket doors do not need 'swing' room to use valuable floor space.

Tricycle hangers provide smooth rolling action and are GUARANTEED jump proof. Unique design of floor brackets allow for settling of floor without distorting header track.

Available for all standard door sizes, or an all-purpose size to minimize inventory.

NOTE: The 1500 Series Frame is available for custom doors up to 5'0" wide; 9'0" high; and up to 200 pounds in weight.

Single packed ready for installation in rough opening

EXCEPTIONAL FEATURES

STRONG STIFFENERS

Split jamb and stud uprights have full steel sides and backs to provide maximum rigidity for wall material and restricts nails from penetration into pocket. Slots allow room for easy nailing of trim stops.

REMOVABLE TRACK

Track has keyhole slots for easy removal without tearing out walls. Box design prevents rollers from jumping track. Convex rails provide one-point wheel contact for smoothness — dirt traps for free rolling.

TRICYCLE HANGERS

Tri-design insures all wheels carry weight equally. Smooth rolling, balanced wheels ride with minimum friction on convex track rails. A 'flip-of-a-clip' separates hangers from doors for easy door removal.

*SELF-ADJUSTING FLOOR ANCHORS

Long vertical fingers slide into split studs — allow for settling of floor without disturbing horizontal alignment of header and track. Plates can be nailed or cemented to floor.

*NOTE: 1-3/4" doors require Pt. No. 1575 Adaptor Kit. See OPTIONAL listing.
