

Non-Venting Acrylic Skylights

Impact Resistant
Double Acrylic Domes
....The Economical Choice.

Curb Mounted

Intergrated Flashing
Easy Installation
Double Acrylic Domes
Bronze or Clear Outer Dome
5 Year Warranty

Self Flashing

- ❖ Energy efficient, thermally broken frame for cooler climates
- ❖ Requires site-built wood curb

- ❖ Energy efficient vinyl frames
- ❖ Integral flashing for easy installation on asphalt roofs

Skylights are the perfect solution to a dark and dreary living space. They flood a room with as much as five times the light of a traditional wall window of the same size. If you have a room that's not as bright and cheerful as you'd like, add VISTA Skylights and bring in the sun and the sky.

Skylights are an attractive, economical lighting alternative, featuring UV-protected acrylic and polycarbonate domes.

Sizes.
Generally, you should have one square foot of skylight for every 20 square feet of floor space. You can achieve this with either one large skylight or several smaller ones.
